Summary

Recent VFX graduate with a Computer Science background, specializing in **Nuke compositing and CG shot integration**. Adept at combining multi-pass Arnold/Karma renders with live-action plates, executing clean keying, roto/prep, and deep compositing. With a background in Houdini FX, lighting, and Python scripting to troubleshoot complex AOV handoffs between 3D and 2D departments, ensuring clean, photorealistic results under tight production deadlines.

Education

Bournemouth University

Visual Effects

BA

Bournemouth, UK • Sept 2023 – June 2026 (Expected)

University of Chinese Academy of Science

Computer Science

BSc(Coursework Completed)

Beijin, China • Sept 2020 - June 2023

Projects

‘Brain-Squid’ Creature Integration

- A full-pipeline project integrating a multi-solver creature simulation (Vellum, FEM, FLIP) into a self-shot live-action plate, covering the process from matchmoving to final compositing.

Great Robot (Asset Integration)

- Full Pipeline CG Integration, compositing a CG robot into a live action plate. Responsible for texturing, animation, lighting, rendeing, tracking, layout, roto, and final compositing.

Agent & Explosion(Greenscreen Scene Integraton)

- Integrated green screen keying with multi-layer 2D assets, stock explosion footage, bullet hits, and custom scarring.

Technial Skills

🌀 FX Simulation & Technical Direction

Houdini, Pyro, Vellum, Flip, RBD, HDA Creation, KineFX & Apex Rigging, Procedural Animation, Solaris Setup & Karma rendering

🎬 Compositing & Integration

Nuke, CG Integration & Multi-Pass Compositing, Technical Grading & Color Science, Rotoscoping

🎮 3D Modeling & LookDev

Maya(Modeling & Rigging), Zbrush(Creature Modeling), Substance Painter(Texturing), V-Ray, Arnold

🔗 Coding

VEX, Python, C
